BACKGROUND OF INVENTION--FIELD OF INVENTION

Grocery stores and supermarkets commonly supply consumers with rectangle-shaped baby wipes, which are hard to handle, and not reusable, after first use.

Baby Handy's Baby wipes are shaped to fit like a glove and more sanitary and convenient.

SPECIFICATIONS:

- 0001        Baby Handy's baby wipes are made by placing two cut-out mitten-shaped baby wipes, joining together along edges, except opening at the wrist bottom.
- 0002        Baby Handy's baby wipes protect hands and nails from germs and mess; and baby bottoms from fingernails.
- 0003        Baby Handy's are reusable when turned inside-out.
- 0004        Thereafter, inventors created improvements: making baby wipes;thicker,scented,quilted, however, no more sanitary or convenient. Thus, baby wipes tend to be rectangle in shape, and do not cover entire hand from germs. and babies are protected from fingernails.
